

You are invited to attend...

Encore Analytics Pro Tools Session

Thursday, June 1st at 12:30pm
Exhibition Hall lunch area

In this session, Encore will explore...

“Portfolio Analysis Using Performance Data”

We will demonstrate the benefits of using portfolios to gain situational awareness by program, organization, customer or any other natural grouping of projects. Participants will also learn the advantages of deploying a single integrated browser-based solution for enterprise analytics.

Empower is a program performance management tool that integrates cost, schedule, work authorization, data quality checks, data-driven audit support, narrative analysis workflow, and corrective action tracking into a single integrated browser-based analytical tool. It is purpose-built to provide all program stakeholders with comprehensive program performance analytics, streamline the monthly formal reporting process, and to improve the quality and consistency of program deliverables.

► Win an Amazon Echo Dot!

Since this session occurs at lunch, let's make it exciting and fun! The theme will be EVM and we'll ask Jeopardy-style questions throughout the session. Each correct answer – in the form of a question, of course – will win one of six Amazon Echo Dots.
