

# Attend Steelray's Pro Tools Training Session

Wednesday, May 31st, 10:30am

In the Pro Tools Training Session Area in the Exhibit Hall

## **Steelray Project Analyzer Training**

In this session, you'll learn how to use Analyzer to produce a better (and more trustworthy) critical path.

If you're a beginner, you'll get a good understanding of why you should use Analyzer and the basics of using it.

If you have some experience using Analyzer, you'll learn how to use features that you probably didn't know existed.

If you're a seasoned Analyzer practitioner, you'll see what's new in Analyzer and extend your expertise.
