7:30 – 8:00 am

in the Exhibit Hall

New DCMA and GAO Schedule Health Metrics in DCMA Schedule Analyzer forProject™

Join us for a short preview of the new and advanced schedule health check metrics available in **DCMA Schedule Analyzer forProject™ Version 4.0** in advance of the commercial release later this summer!

Get a head start on planning for how you'll use these new health checks, including many that support the latest **DCMA data-driven metrics** and the **GAO Scheduling Best Practices**, in your own environment.

Come find out why so many organizations have adopted **DCMA Schedule Analyzer forProject** as their tool of choice for quicker, easier (and now more powerful) schedule health checks in Microsoft Project. If time permits, we'll also show you a fast, and flexible way to produce the IPMR Format 6 in XML format!
